2011 Who's Who in Energy

Energy is a vast and fast-moving industry, which makes it simultaneously a key area for business-to-business development and a tough field with which to keep pace.

To help readers connect with the key players, three affiliated publications — the *Dallas Business Journal*, *Houston Business Journal* and *Pittsburgh Business Times* — worked together to create this special Who's Who in Energy feature. The newsrooms of the three business journals selected the honorees from a combination of internal research, industry outreach and an open nomination process.

The result is an introductory guide to 300 leaders working in positions throughout the energy industry, including finance, law, engineering and, of course, energy companies themselves.

Engineering

Alexandre Kosmala
